OF THE CHICAGO DENTAL SOCIETY

PRELIMINARY PROGRAM  
1953 MIDWINTER MEETING

# CONFIDENCE..

## with CO-RE-GA

You can prescribe Co-re-ga, with confidence in its quality and effectiveness, and in its strict adherence to the highest standards of ethical conformance.

Co-re-ga (in turn) can help strengthen your new denture patients' confidence in your dentures and your professional skill, by easing the difficult period of initial adjustment.

# CO-RE-GA

CO-RE-GA IS NOT ADVERTISED TO THE PUBLIC

*You*

can't take it with you!

## **TICONIUM is cast to FIT!**

No plier-fits in a Ticonium case. You'll marvel at the inlay-accuracy which makes clasps hug the tooth with a fond caress.

Ticonium alone of the chromes has fine-grain for strength; Inlay-accuracy for fit; Ti-Lectro polish for brilliance. That spells FIT!

You are missing the best if you don't prescribe Ticonium on your Prosthetic cases.

For cases that FIT . . . specify

a permanent bond...

amazing resin cement

will not wash out...

**DuraCement**

**HARD, STRONG, LASTING**

DuraCement is hard, strong, dense. Superior to zinc cements, it forms a permanent, mechanical bond that will not wash out, crumble or disintegrate.

**ALL-PURPOSE VERSATILITY**

DuraCement forms a lasting seal between tooth enamel or dentine, and gold, porcelain or acrylic on jacket crowns, bridges, inlays, facings. It is non-irritating to nerve, pulp or tissue; unaffected by heat, cold, or mouth fluids.

**SATISFACTION GUARANTEED**

Use DuraCement on several cases. Color blending, consistency of mix, and speed of application are easily controlled. The bond sets permanently in 6 minutes . . . If you are not entirely satisfied, remainder of package may be returned for full credit.

Use DuraCement for . . .

porcelain, gold, acrylic  
jacket crowns, inlays, bridges

*Order through your dealer*

The DuraCement introductory kit includes Liquid, Dropper, and 4 shades of Powder. \$11.50 value for \$10.00.

White flecks are quartz par-  
ticles. Note dense structure.

These photomicrographs were made under polarized light at 200X. Reproduced here reduced one-third.

**NU-DENT** Vacuum Fired Porcelain Restorations possess  
esthetic qualities and physical properties unattainable  
in conventionally fired porcelain —

- A Vibrant Brilliance and Translucency.
- Exquisitely Natural Shading.
- Freedom from Pits, Pores and Air Pockets.

See Comparative Photomicrographs above.

- Notably Increased Strength, Hardness, Density.\*

All these superlative qualities result from the removal of gases  
and entrapped air from the porcelain by the high vacuum  
(635 mm. mercury) in which it is fired.

**V**ACUUM Firing of Hand-Carved Porcelain Restorations  
was originated by Nu-Dent, who developed the special  
high fusing porcelains necessary for accurate shade control;  
developed the process; and designed and built the special  
high vacuum firing furnaces.

Genuine, Vacuum Fired Porcelain Restorations are obtain-  
able only from Nu-Dent Porcelain Studios. However —

**VACUUM FIRED  
PORCELAIN JACKET CROWNS**

*a First with*

**Kramer**

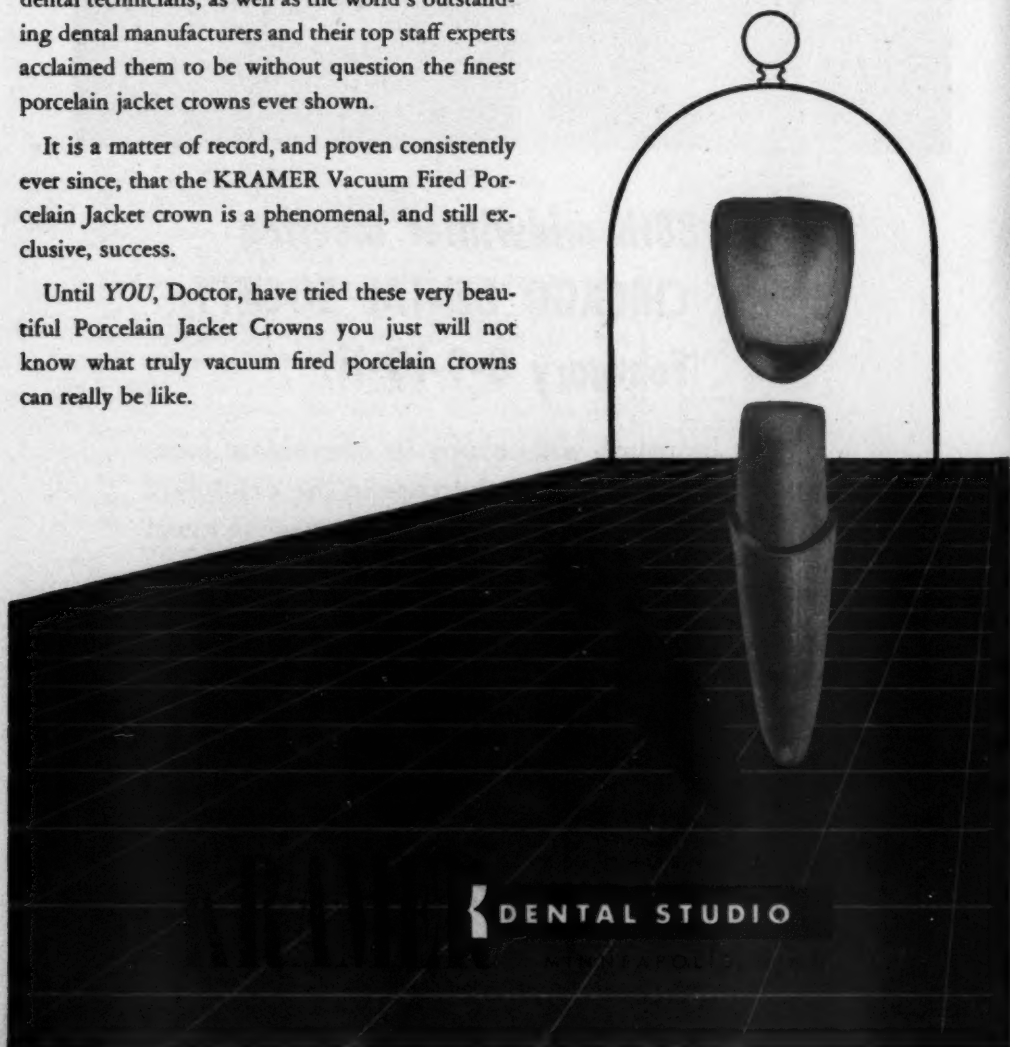

The very FIRST VACUUM FIRED porcelain jacket crowns ever shown to the dental profession were put on exhibit by KRAMER during the February 1951 Chicago Mid-Winter dental meeting.

At that time the nation's greatest dentists, finest dental technicians, as well as the world's outstanding dental manufacturers and their top staff experts acclaimed them to be without question the finest porcelain jacket crowns ever shown.

It is a matter of record, and proven consistently ever since, that the KRAMER Vacuum Fired Porcelain Jacket crown is a phenomenal, and still exclusive, success.

Until *YOU*, Doctor, have tried these very beautiful Porcelain Jacket Crowns you just will not know what truly vacuum fired porcelain crowns can really be like.

See them on exhibit at Booth 25 during the 1953 Chicago Mid-Winter meeting, or better yet, send us your impressions and have KRAMER porcelain experts vacuum fire your porcelain jacket crown cases.

88th Midwinter Meeting, Chicago Dental Society

# *The Fortnightly* **REVIEW** *of*

**THE CHICAGO DENTAL SOCIETY**

*January 2, 1953*

*Volume 25 • Number 1*

## **Bob Pollock Presents—**

**A**t ten o'clock in the morning on Sunday, February eighth, a blue-uniformed Andy Frain usher, hallmark nationwide of Chicago's eager throngs, will draw back the curtain barring the entrance to the Conrad Hilton Hotel's Normandie Lounge undamming the flood of registrants waiting to enter the Chicago Dental Society's 88th Midwinter Meeting. For the rest of the morning the Normandie Lounge will be the teeming center of activity of the meeting but throughout the vast caravansary the last and final touches will be in progress to a variety of closely related enterprises. The next of these to officially open its doors is the Commercial Exhibit filling the entire lower floor of the hotel and featuring thirty-nine new spaces in what was the Coffee Shop in years past. As in 1952 the exhibits will open at 1:00 p.m. on Sunday afternoon. Then, on Monday morning, the full program of essays, exhibits, limited attendance clinics, lectures, symposia, motion pictures, general sessions, table clinics, receptions, parties and meetings will get under way. Culminating four days of solid dental education, casual information-gathering and happy camaraderie will be the dinner-dance and floor show in the Grand Ballroom on Wednesday evening. This culminates four days of outstandingly worthwhile effort and enjoyment for the twelve thousand people who will attend

the meeting but for the man on the opposite page it will culminate over a year's planning, working and outstandingly painstaking attention to myriad details that have gone into the warp and woof of the Midwinter Meeting. Note that the first meeting that Dr. Pollock called to lay the groundwork for the 1953 Midwinter Meeting took place in January before the 1952 meeting! From then on, through the months of spring, his committees met and reviewed past programs, exhibit lists, motion picture reports and other data on past meetings here and inspected dozens of program reports relayed to him from visitors to meetings elsewhere. Various suggestions and ideas for changing parts of the meeting to conform with the changing desires of the dentists who would attend were carefully formulated and considered. More often than not, they were rejected when the light of past experience revealed some flaw or foible that would render them unfeasible but, just as often, some phase of every suggestion was adaptable, usable in fabricating an improved program, a more readily assimilable presentation or a more inclusive schedule. After many committee meetings and conferences had been held and the formula for the outlines of the meeting had been decided upon, specific selections of speakers and topics were made. All of the various program committees, exhibit committees and

smaller groups of chairmen worked steadily through the canicular inertia of summer and into the fall, cutting and shaping and redrawing the texture of the meeting until one well-contrived whole is the end product of their toil. Throughout all of these meetings, planning sessions, selection debates, replacement conferences and hour-after-hour discussions Dr. Pollock has faithfully been at the right hand of every committee chairman, every committee member. The role of General Chairman is a most difficult one, one that makes its occupant responsible for the results of others but presupposes enough *laissez faire* to insure the freest expression of individuality, allows those in subordinate roles to enjoy the widest freedom of choice. Dr. Pollock has, through a happy mixture of good nature and horse sense, established a happy middleground in which his committee chairmen have created their own individualized parts of the meeting but have carried out the General Chairman's basic ideas and overall plans. This is one of the rare tricks of coordination, few executives can do it.

Under the section headings in the following pages of this Preliminary Program you will find the names of the Chairman and the Vice-chairman of each committee. Study the cold print that sets forth what each has erected as the result of this past year's work. It represents a lot of time and energy and perspiration.

One of the chief aims of the program planners was a wide selection of topics that would present the latest and best developments in dentistry in just the correctly balanced proportion between all the various categories and specialties. Examination of the program lists of essayists, clinicians in the limited attendance clinics and table clinics, scientific exhibits, health and educational exhibits and motion pictures and scrutiny of the subject material will show how faithfully this intention has been carried out.

The program this year presents thirty-nine essays and two symposia, on fluoridation of community water supplies and on the handling of cleft palate cases. In

the limited attendance section of the program fifty-seven clinicians will present one hundred and thirty-one separate clinics. On Tuesday afternoon in the Grand Ballroom the General Clinic Committee will stage a program of seventy-one table clinics. A carefully selected array of scientific exhibits, health and educational exhibits and motion pictures assures a complete and forward-looking visual education section for the program.

An innovation in the general scheme of things is to be noted in the 1953 meeting. A luncheon and fashion show in the Narcissus Room at Marshall Field's takes place on Tuesday noon. Both Dr. Pollock and Dr. James Keith, President of the Society, entertained conjecture relative to restoring a program of entertainment for the female contingent to the Midwinter Meeting curriculum early in their planning. Careful investigation and committee planning have insured an enjoyable function to a segment of our registrants somewhat neglected in the years since the war.

The area formerly occupied by the Coffee Shop in the Conrad Hilton and now remodelled into a section of the exhibit hall provides very fine locations for the firms that have contracted for space there. The entrance door to this section is just at the foot of the stairs coming down from the main corridor of the lobby floor making these exhibits the most readily accessible of all the exhibit spaces. However, it is a new area, one that the Chicago Dental Society has never used before and the firms that have elected to take space there have done so with an element of chance balanced against the fine reputation our meeting has for attracting an active group of interested customers. Your attention to this section is requested, your presence there will be appreciated.

All in all, the meeting that Dr. Pollock has worked up for February in Chicago is a dandy. We'll see you in the essays, we'll see you in the clinics, we'll see you in the exhibits, we'll see you at the dinner-dance on Wednesday night and we'll be glad to have you with us.

# NEWS AND ANNOUNCEMENTS

## **SOMETHING FOR THE GIRLS!**

Tuesday noon, February tenth. Mark that one down in your date book. At 12:30 that day, during the Midwinter Meeting, the Chicago Dental Society revives an old custom (one of the good old customs, that is) and gives the girls a break, namely: luncheon and a fashion show in the swanky Narcissus Room at Marshall Field's great store in Chicago's Loop. During the war this separate function for the ladies fell by the wayside. Time and a lack of facilities in those crowded years, times of reorganization and dislocation made some of the finer things hard to manage. But now, the 1953 Ladies' Entertainment Committee, meeting and working with Dr. Fred S. Verink as Chairman, has evolved a deal that really sounds like fun. Field's food is famous, the Narcissus Room on the Seventh Floor is lovely and the clothes are from the "28 shop." Nice deal, huh? Make your reservations with the Society office, address them to Dr. Fred S. Verink, Chicago Dental Society, 30 North Michigan Avenue, Chicago 2, Illinois. Phone number is Randolph 6-4076. Tariff is \$4.00; entire tables may be had for six people, five people or four people or come alone and our hostesses will see that you are introduced to congenial company. No guys allowed!

## **NORTHWESTERN DENTAL ALUMNI LUNCHEON**

On Wednesday, February 11, 1953, the Northwestern University Dental School Alumni Association will hold its annual luncheon during the Midwinter Meeting of the Chicago Dental Society. As a part of the luncheon program in the Grand Ballroom, the Class of 1928 will be honored. A well-known speaker will address the Alumni group which is con-

sistently the largest assembly of dental alumni at this meeting.

The Alumni Association will again maintain Headquarters at the Conrad Hilton Hotel, Room 557-A. Tickets should be purchased before noon on Tuesday, February 10, at the Alumni Headquarters. Telephone reservations will be accepted by Miss Merle Hunter at the Dental School before the Meeting, SUperior 7-4500, Extension 334, or during the meeting in Room 557-A. There is always a greater demand for seats than there is seating capacity. To avoid disappointment, get your reservation in early. This meeting will afford an excellent opportunity to meet with your classmates and friends.

## **WEST SIDE BRANCH JANUARY MEETING**

The West Side Branch of the Chicago Dental Society will hold its next meeting on January 13 at the Midwest Hotel, 6 N. Hamlin Avenue, with dinner at 7:00 p.m. Dr. Waldemar A. Link will be the essayist; his topic, "Practical Considerations in the Placement of Amalgam Restorations."

## **DINING ROOM NO. 3 AT MIDWINTER**

Our Legislative and Law Enforcement Committee and our Ethics Committee jointly have reserved Dining Room No. 3, third floor, Hilton Hotel, as headquarters during the Midwinter Meeting where Chicago Dental Society members and others may have an opportunity to supply information concerning illegal operations of dental laboratories and illegal or unethical activities of dentists. Naturally, all information will be confidential.

In addition to Chicago Dental Society

*(Continued on page 56)*

## Your L & L Committee at Work

William R. Gubbins, Chairman

**I**n accordance with the program instituted by the Legislative and Law Enforcement Committee and the wishes of our President, Dr. James H. Keith, we shall, during the remainder of his administration, bring you in each succeeding issue of the REVIEW such information as is possible. We shall endeavor to do this without violating any secrecy which might endanger the investigation, prosecution, or the alerting of the enemies of public health to certain specific plans of action.

We shall continue the program "Know Your Lab"—alerting you to the illegal actions of the additional laboratories on which we are now gathering data, etc. These labs may be added to the list of violators which we have already sent to you.

We shall inform you of the actions of the Board of Education and Registration on complaints of all violators of the Dental Practice Act. We shall prepare a condensed progress report on the actions of the dental society lawyers. We shall, in the near future, inform you as to what cooperation and action are being taken by the legitimate laboratories—it is time we know who our friends are in this struggle!

Again we wish to remind you that this is organized dentistry's battle—not that of the officers or of the Committee, but all of us. We need your continued participation. We wish to congratulate that great number of members of our Society who already are taking part in this battle. We wish to inform you that our cross-file on illegal operators and those connected with illegal operations has grown in scope and will eventually include the name of every dentist, lab man, and technician who has taken any part in the illegal and dangerous acts against the dental health of the people of our community. All of us must realize

that we are legally and morally entrusted with the dental health of the public and must join in the fight to protect the public and our profession.

The desk of our Program Director, Mr. Edgar T. Stephens, is now being piled high with a multitude of detail and information, but please remember that any little bit of information that you may possess might tie up the loose ends of some major action which we are planning—join the battle!—call Mr. Edgar T. Stephens, RAndolph 6-4076!

Again we wish to thank Dr. Edward J. Sullivan for the intense interest in our problem and the help and cooperation he has given to our Committee.

Following are reports from the chairmen of the five subcommittees of the L & L Committee:

### **INFORMATION SUBCOMMITTEE EARL S. ELMAN, CHAIRMAN**

The many years of effort and thought and work which have gone into building and maintaining dentistry at the high level it has reached today are now being seriously challenged by the actions of certain dental laboratories here in Chicago. These laboratories and their activities are known to all of us and many have voiced legitimate complaints among ourselves as well as to the leaders of organized dentistry. Membership in the Dental Society gives us the privilege of presenting these complaints. We would like to know what is being done to meet this problem. Therefore, with the approval of the Board of Directors of the Chicago Dental Society, an information sub-committee of the Legislative and Law Enforcement Committee has been set up to provide to the members all pertinent information.

You have all received the special

*(Continued on page 58)*

Lecture and Table Clinics on

## ORAL SURGERY

Tuesday, January 20, 1953

Essay in the Upper Tower Room  
Table Clinics in the Lower Tower Room  
The Conrad Hilton Hotel

Our essayist is DR. WILLIAM T. EWING,

Past President, American Society of Oral Surgeons;  
Diplomate, American Board of Oral Surgery;  
Fellow, American College of Dentists;  
Omicron Kappa Upsilon;  
Federation Dentaire Internationale

Dr. Ewing's title is: THE PROBLEMS OF ORAL SURGERY IN DENTISTRY

Dr. Ewing's paper will cover five major aspects of current oral surgery practice:

- (a) Necessity for reasonable fees.
- (b) Obligations of dentists in hospitals.
- (c) Better general anesthesia needed in office practice.
- (d) Newer use of drugs in oral surgery.
- (e) The dentist's responsibility in the recognition of oral lesions.

Following Dr. Ewing's paper the following will present table clinics on various aspects of oral surgery:

From the Dental Department, U.S.N.T.C. Great Lakes:

Stephen A. Grady, Commander, Dental Corps, USN  
Stanley Jakubs, Commander, Dental Corps, USN  
Maurice E. Simpson, Commander, Dental Corps, USN

From the Chicago Dental Society:

Lyle F. Aseltine	William E. Redlich
Robert A. Atterbury	Richard W. Renn
Russell G. Boothe	S. A. Shiret
Robert B. Jans	Viggo B. Sorensen

Essay Program at 8:00 p.m. Table Clinics at 9:30

All this, and more too, at the

REGULAR MONTHLY MEETING

Chicago Dental Society

George W. Hax, Chairman

## *Invitation*

**I**T is our privilege as officers of the Chicago Dental Society to invite you to attend our 88th Midwinter Meeting but it is with an added feeling of distinct personal pleasure that we welcome you in 1953. We have watched the work of our committeemen as they have developed the features of the meeting set forth in the following pages; we are proud to be the formal means by which your attention is directed to the results of their efforts.

No one, from the time that planning for this meeting was started, has left one thing undone that might better the scientific program, enhance the exhibits or advance the value of the meeting to all of us. We deeply appreciate the time and work of those whose hours and efforts have made the meeting possible.

Come and see in '53!

James H. Keith, *President*

Samuel R. Kleiman, *Secretary*

## REGISTRATION AND CREDENTIALS

WAYNE L. FISHER, *Chairman*

HARRY H. KAZEN, *Vice-Chairman*

### WHO MAY REGISTER

1. All regular active, life, retired or honorary members in good standing of the Chicago Dental Society for the year 1953 (dues, if not paid previously, may be paid at the Registration Desk);
2. All associate members in good standing of the Chicago Dental Society for the year 1953;
3. All members of the Dental Corps of the United States Army, Navy, Public Health Service, or Veterans Administration who are members in good standing of the American Dental Association;
4. Other members of the dental profession who are members in good standing of the American Dental Association or a recognized foreign dental society upon payment of a registration fee of \$3.00. Payment of this fee will entitle the registrant to all privileges of the meeting;
5. All applicants for membership in the American Dental Association, provided a written statement is presented from the Secretary of the local society in which his application is pending;
6. All dental assistants and dental hygienists who are members in good standing of their respective national associations, or who are employed by a member in good standing of the American Dental Association, or a recognized foreign dental society, provided evidence to that effect is presented in writing;
7. Laboratory owners and technicians upon presentation of evidence of membership in good standing of a recognized state or national laboratory association, or upon written endorsement of a member of the American Dental Association;
8. Dealers' and manufacturers' representatives upon presentation of evidence of membership in good standing of a recognized national dealers' or manufacturers' association;
9. Senior and junior students of recognized dental schools and colleges upon presentation of proper identification;
10. Members of the family of an American Dental Association member upon written endorsement;
11. Lay persons upon filing an approved application form, endorsed by an American Dental Association member.

## AFFILIATED GROUPS

The organizations listed below will hold functions during the period of the meeting. Those designated with an asterisk will have headquarters rooms.

## PRIZE ESSAY CONTEST

The Twelfth Annual Prize Essay Competition sponsored by the Chicago Dental Society as a part of the 88th Midwinter Meeting of the Society was won by Drs. Bernard Jankelson and George M. Hoffman and Mr. J. A. Hendron, Jr. of Seattle, Washington.

The title of their essay is "The Physiology of the Stomatognathic System." It will be presented at the Second General Session which takes place in Private Dining Room Number Two of the Conrad Hilton Hotel on Wednesday morning, February 11, at 11 o'clock.

Dr. John J. McBride, Chairman of the Program Committee of the Midwinter Meeting, will preside at this General Session and Dr. James H. Keith, President of the Chicago Dental Society, will present the prize award to the winners on behalf of the Society.

The senior author, Dr. Jankelson, will read the paper. He is a diplomate of the American Board of Prosthodontics, a Clinical Associate and Special Lecturer in Prosthodontics at the University of Washington School of Dentistry and Director of the Seattle Prosthetic Seminar. Dr. Hoffman is a Technical Research Associate of Dr. Jankelson and Mr. Hendron is an X-ray Engineer in the Department of Biophysics and Physiology in the University of Washington School of Medicine.

---

### *Memo to dentists:*

During your stay in Chicago you are cordially invited to visit the Central Office headquarters of the American Dental Association at 222 East Superior Street.

The Central Office is open daily from 8:30 a.m. until 5 p.m. Staff members will be pleased to escort you through the Office at your convenience.

Harold Hillenbrand, D.D.S.  
*Secretary*

## LIMITED ATTENDANCE CLINICS

GRAHAM O. DAVIES, *Chairman*  
CLIFFORD K. LOSSMAN, *Vice-Chairman*

The Limited Attendance Clinic program will be presented Monday, Tuesday and Wednesday morning and afternoon, February 9, 10 and 11. Each clinic will be of one and one-half hours duration; one session will be presented each morning and two sessions each afternoon.

There will be a charge of \$2.00 per clinic enrollment payable at the time of application. This charge is made to limit applicants to those whose attendance is definite and to partially defray the cost of this program.

It is not necessary to fill out any formal application blank to enroll in one or more clinics. Simply drop a note to the Chicago Dental Society, 30 N. Michigan Ave., specifying the clinic or clinics desired, *giving as many selections as possible, both as to choice of clinics and choice of dates.* Please refer to the program for the day or days each clinic is to be presented. All applications must be accompanied by remittance of \$2.00 for each clinic for which enrollment is sought. Those desiring to enroll are urged to apply early and to be as brief as is consistent with a full explanation. Applications will be time stamped and considered in the order of receipt. Upon assignment, applicant will be sent cards of admission. Fees paid are not subject to refund except upon cancellation of clinics by the Society.

Applications received on and after January 30, will receive the same consideration as all applications received prior to that date except that, due to limitations of time, applications for clinics in which there are no vacancies will be cancelled automatically. No cards of admission will be mailed after January 30. Cards of admission for clinics in which there are vacancies will be held at the committee headquarters at the Conrad Hilton Hotel for delivery, upon demand, to the applicant. The committee cannot engage in correspondence with applicants whose applications are not in the committee's hands before January 30.

## CHILDREN'S DENTISTRY

### 1. The Use of Chrome Steel in Dentistry for Children

WILLIAM P. HUMPHREY.....DENVER, COLORADO

Presented on Wednesday at 1:45 and 3:45 p.m. in Room 512

The use of preformed crowns for rehabilitating badly broken down teeth; use of anterior crowns for fractured teeth, thumb cribs and space maintainers.

### 2. Pedodontic Pitfalls in General Practice

STANLEY R. KORF.....CHICAGO

Presented on Monday and Tuesday at 10:30 a.m. in Room 512

The clinician will present his methods of handling the various situations that give the general practitioner his greatest trouble. Procedure at the first visit, the "difficult" child, thumb sucking, extractions, parent education and fees will be discussed. The audience will be invited to present difficult cases for individual analysis.

### 3. Management of the Child Patient and Parent

FRANCIS W. SUMMERS.....LOS ANGELES, CALIFORNIA

Presented on Monday at 1:45 and 3:45 p.m. in Room 512

The clinic "Management of the Child Patient and Parent" will be illustrated by slides, and include the following phases: Various environmental vanguards representing the dentist, his office and the personnel preceding treatment of children; the use of the telephone, reception room, operator and equipment, with suggestions for the limited and general practitioner; coordination of ancillary personnel to abet the minor management problems; attitude of the dentist, separation of the child from the parent, friendship gestures and uniforms—as they pertain to control of the child; the relative importance and danger of physical discipline, voice control and the importance of correct follow-through procedures.

## ORTHODONTIA

### 4. Preventive Orthodontics and Minor Corrections

WILLIAM S. BRANDHORST.....ST. LOUIS, MISSOURI

Presented on Monday and Tuesday at 10:30 a.m. in Room 549

This clinic will present through models, slides and actual fabrication, the technic of construction of the plastic Johnson shield, and two simple technics for opening and consolidating spaces. Models and slides will demonstrate the course of treatment.

### 5. The Mechanics of Occlusal Equilibration for Orthodontic Patients

JOHN I. INGLE.....SEATTLE, WASHINGTON

Presented on Monday at 1:45 and 3:45 p.m. in Room 556

The relapse of the completed orthodontic case might well be prevented by selective reshaping of the teeth. Simple grinding may be done during active treatment or retention. Through the use of slides and mounted models the clinician will demonstrate principles of equilibration applied to orthodontic cases. The rules of equilibration illustrated, will be supplied.

### 6. Orthodontic Treatment in the Early Years in the Light of Newer Knowledge

SAMUEL J. LEWIS.....KALAMAZOO, MICHIGAN

Presented on Wednesday at 1:45 and 3:45 p.m. in Room 556

A presentation of models, photographs and cephalometric sagittal head x-rays, showing the results in early treatment of certain types of malocclusion; their diagnosis and analysis, together with the methodology of treatment.

### 7. Aims and Aids

FRANCIS J. LOUGHLIN.....JAMAICA, NEW YORK

Presented on Monday and Wednesday at 10:30 a.m. in Room 556

This clinic will show instances where the use of one appliance or auxiliary seems to be superior to another and how a better over-all system may be obtained by using the advantageous principles of one technic in conjunction with another.

## OPERATIVE DENTISTRY

### 8. Use of Self-Polymerizing Acrylics in Gold Inlay and Bridge Castings

WILLIAM B. BURKE.....CHICAGO

Presented on Wednesday at 1:45 and 3:45 p.m. in Room 516

Using an acrylic pattern of either a fixed or removable bridge for registering occlusion and the fit of abutments in the patient's mouth and then casting in metal from this acrylic "Pattern." I will demonstrate the impressions, preparing the acrylic patterns, investing and discuss possible errors to be avoided. The actual casting technic is the same as employed using waxes.

### 9. Plastics in Operative Dentistry

HERBERT D. COY.....RICHMOND, VIRGINIA

Presented on Wednesday at 1:45 and 3:45 p.m. in Room 547

This clinic will differentiate between the various types of cavity preparation necessary for the retention of the material. The compensation or brush technic will be demonstrated by the insertion of several fillings at each session. The use of a matrix on Class III fillings will be demonstrated; also the best method of finishing and polishing.

**10. Restorations of Silver Amalgam**

**DONALD A. KEYS.....LINCOLN, NEBRASKA**

Presented on Monday at 1:45 and 3:45 p.m. in Room 361

Emphasis is to be placed on cavity preparation and a regard for the physical properties of the restorative materials. The importance of alloy-mercury ratio, proper trituration, condensation and finishing will be discussed. Illustrations showing effects of insufficient condensation, over-condensation, secondary trituration, burnishing and improper polishing methods will be presented.

**11. Practical Considerations in the Placement of Amalgam Restorations**

**WALDEMAR A. LINK.....CHICAGO**

Presented on Tuesday at 1:45 and 3:45 p.m. in Room 316

Silver amalgam becomes a very important restorative material when dentists ask themselves this question: "What would I do without amalgam in my dental practice?" This illustrated clinic will stress the important factors which make for successful amalgam restorations. Cavity preparation, alloy selection, methods of trituration, matrices, condensation, carving and finishing will be discussed and illustrated.

**12. The Fabrication of Improved Amalgam Restorations**

**JOHN H. MOSTELLER.....MOBILE, ALABAMA**

Presented on Tuesday at 1:45 and 3:45 p.m. in Room 545

This presentation is fully illustrated by colored slides and will cover diamond instrumentation, cavity sterilization, protection of the pulp, selection of alloy and mercury, matrix adaptation, manipulation of alloy and mercury, fabrication of the restoration, finishing and polishing of same, and some economic considerations in successful amalgam restorative service in private practice.

**13. Suggestions for Making Better Inlays**

**PEYTON S. NEUWIRTH.....PEORIA, ILLINOIS**

Presented on Monday at 10:30 a.m. in Room 513

The making of an accurate fitting gold inlay, regardless of the number of surfaces involved, should be a systemic application of basic fundamental chair and laboratory procedures. This lecture will give a step by step outline of such planned treatment. The clinic includes the hydrocolloid impression technic, the making of stone dies, wax patterns, casting and investing.

**14. Rational Use of Plastics—Rapid Self-curing Materials for Fillings in Teeth**

**LEON SAKS.....CINCINNATI, OHIO**

Presented on Monday and Tuesday at 1:45 and 3:45 p.m. in Room 513

Physical properties of material, technic for rational use (use of beneficial properties, overcoming of disadvantages), as filling material, comparison with silicates; Nealon brush technic and some modifications to nullify possible dimensional changes.

**15. Diagnosis, Dentistry's Neglected Opportunity**

**SEYMOUR H. YALE.....CHICAGO**

Presented on Wednesday at 1:45 and 3:45 p.m. in Room 513

Accurate diagnosis is the underlying basis for building a lasting dental practice. It involves the patient who has the tooth as well as the tooth which the patient has. The presentation will be fully illustrated with colored slides of actual clinical cases.

## CROWN AND BRIDGE

### 16. The Porcelain Jacket Crown on Normal and Abnormal Teeth

S. CHARLES BRECKER.....NEW YORK

Presented on Monday at 1:30 and 3:30 p.m. in Room 545

(1) Procedures used to facilitate the preparation of decayed, malposed and malaligned teeth will be presented. (2) A short color motion picture emphasizing instrumentation and finger positions on the preparation of a normal tooth for porcelain jacket crown. (3) Correction of abnormal and objectionable spaces by ceramic means. (4) The porcelain crown in fixed bridge construction.

### 17. A Simple Technic for Precision Gold Inlays

DUANE CORY.....CHICAGO

Presented on Tuesday and Wednesday at 10:30 a.m. in Room 513

Clinic will consist of a discussion and demonstration of a technic which gives us precision gold castings by understanding and utilizing the known physical properties of the materials used.

### 18. Detailed Technic of Instrumentation for Preparation of Anterior Three-quarter Veneer Crown

ROBERT P. DRESSEL.....CLEVELAND HEIGHTS, OHIO

Presented on Monday, Tuesday and Wednesday at 10:30 a.m. in Room 547

Subject prompted by belief that most three-quarter veneer crowns fail because of improper tooth preparation. Kodachrome motion picture used to demonstrate clinical preparation supplemented by Kodachrome transparency for steps in preparation. Audience invited to discuss problems of diagnosis regarding this preparation.

### 19. The Use of Fast Curing Acrylics in the Construction of Inlays, Crowns and Fixed Bridgework

DANIEL F. DUFFY, JR.....CHICAGO

Presented on Monday and Tuesday at 10:30 a.m. in Room 546

This clinic will show a modern method of constructing inlays, crowns and fixed bridges. The technic of using fast curing acrylics as a substitute for inlay wax will be demonstrated with Kodachrome slides.

### 20. Fixed Bridgework Movable at All Abutments. Pontics Have a Limited Amount of Movement. It's a Stressbreaker Tissue Borne

ROBERT W. JOFFEE.....CHICAGO

Presented on Monday at 1:30 and 3:30 p.m. in Room 546

Presented on Wednesday at 10:30 a.m. in Room 546

Upon looking up the literature, I believe this is original.

### 21. The Use and Relative Merits of Reversible Hydrocolloid and Alginate for Indirect Restorations

RALPH W. PHILLIPS.....INDIANAPOLIS, INDIANA

Presented on Wednesday at 1:30 and 3:30 p.m. in Room 545

Presentation will cover the difference in the chemical and physical properties of hydrocolloid and alginate and their relative merits for indirect procedures. Technics for each will be presented and essential factors to be considered will be illustrated both by scientific data and practical dies of critical cavity preparations. This will include the common causes of distortion and inaccuracy, proper equipment required by each technic, temperature control, storage medias and fixing solutions, factors which influence the surface of the stone dies, etc.

## PERIODONTIA

### 22. Periodontal Trauma in Theory and Practice

MAX GRATZINGER .....CHICAGO

Presented on Monday at 10:30 a.m. in Room 507  
Presented on Tuesday at 10:30 a.m. in Room 536

The undisputed existence of periodontal trauma will be discussed as seen by the clinician in regard to its source and to the ways of its introduction. Its effect will be demonstrated as found in an experimental study. The problem of its elimination will be demonstrated and illustrated by slides giving case histories of patients which are under control for a period of five to twelve years.

### 23. Periodontia Cases: Diagnosis, Treatment and Results

WILLIAM LESTER MCDANIEL .....CHICAGO

Presented on Monday at 1:45 and 3:45 p.m. in Room 507

Periodontia will be presented through the discussion of actual cases. Radiographs, study models and Kodachrome slides will be used where appropriate. Emphasis will be placed on the diagnosis of the causative factors, treatment of the periodontal problem and the results obtained by the treatment.

### 24. Conservative Procedures in Periodontia

SIGURD RAMFJORD .....ANN ARBOR, MICHIGAN

Presented on Tuesday and Wednesday at 10:30 a.m. in Room 507

The various practical steps in conservative periodontal management will be discussed and illustrated by Kodachrome slides. Indications and technic for subgingival curettage and reattachment will be related to recent investigations.

### 25. Applied Nutrition in General and Periodontic Practice

HARRY ROTH .....NEW YORK

Presented on Wednesday at 1:45 and 3:45 p.m. in Room 521

It has been the clinician's experience that nutritional inadequacy may contribute to many oral diseases. Presentation of actual cases with the aid of colored slides, will illustrate the conditions met with and treated in our daily practice. A simple, effective office procedure for diet correction will be given.

### 26. Periodontal Care in Modern Practice

IRVING CHARLES STONE .....MCHENRY, ILLINOIS

Presented on Monday and Wednesday at 10:30 a.m. in Room 561

The concept of periodontal care is synonymous with all that is embodied in positive clinical dentistry which in any way affects supporting tissues of the natural dentition. Its basic aim is the maintenance of the health of these tissues and hence the prevention of the loss of natural teeth for the lifetime of the patient as a result of periodontal destruction. The concept will be discussed and practical office technics dealing with prevention, recognition and treatment, and control of periodontal disease will be demonstrated.

## ENDODONTIA

### 27. Modern Endodontic Procedures

VICTOR H. DIETZ.....ST. LOUIS, MISSOURI

Presented on Monday at 1:45 and 3:45 p.m. in Room 549

The clinical diagnosis of various pulp involvements will be discussed. Radiographic technics and the interpretation of periapical disease will be explained. Preparatory procedure, instrumentation, obturation, and the bleaching of teeth will be adequately treated. A review of therapeutics, antibiotics and supportive drugs used in endodontics will be presented.

### 28. Root Canal Therapy

LESTER E. KALK, VINCENT B. MILAS AND T. G. STARSHAK.....CHICAGO

Presented on Monday at 1:45 and 3:45 p.m. in Room 547

A rapid time saving technic of root canal therapy without benefit of surgery will be demonstrated. The clinic will cover a demonstration of all phases of saving teeth either with a vital exposed pulp or with a putrescent involvement.

### 29. Endodontia

JOSEPH S. RESTARSKI.....OAK PARK, ILLINOIS

Presented on Monday, Tuesday and Wednesday at 10:30 a.m. in Room 509

(1) Indications for root canal therapy, (2) Indications for pulp capping and pulpotomy, materials used, (3) Medications used in the root canal, (4) Asepsis in root canal treatment, instruments, materials, (5) Culturing, (6) Filling the root canal.

### 30. Pulp Therapy of Children's Teeth

GORDON H. ROVELSTAD.....ELGIN, ILLINOIS

Presented on Wednesday at 1:45 and 3:45 p.m. in Room 561

This discussion will include the place of pulpotomy, pulp capping and pulpectomy as technics in clinical Pedodontics. Also the anatomy of the primary teeth and young permanent teeth as it relates to their clinical management will be discussed, as well as illustrated.

## ORAL SURGERY

### 31. Surgical Removal of the Impacted Mandibular Third Molar

HOWARD E. GILLETTE.....AURORA, ILLINOIS

Presented on Monday, Tuesday and Wednesday at 10:30 a.m. in Room 534

(1) Preoperative diagnosis, clinical and radiographic, with many examples of reasons for removal. (2) Operative technics, atraumatic surgery with detailed description of instruments. (3) Postoperative treatment, instruction and visits.

### 32. Differential Diagnosis of Radiolucent Lesions of the Jaws

BENJAMIN GANS.....CHICAGO

Presented on Monday at 1:30 and 3:30 p.m. in Room 516

We shall cover the etiology, pathogenesis and the roentgenographic appearance of the common and the less common lesions of the jaws. A classification leading to a logical procedure for the interpretation of the roentgenograms will be given. The clinic will be augmented with slides.

**33. Newer Concepts in the Treatment of Oral Infections**

DANIEL M. LASKIN AND IRWIN B. ROBINSON.....CHICAGO

Presented on Monday, Tuesday and Wednesday at 10:30 a.m. in Room 516

An understanding of the spread of oral infections, their areas of localization, and a rational approach to their treatment depends upon a thorough knowledge of regional anatomy. With this in mind, the discussion, illustrated with Kodachrome slides, will include: (1) A brief review of the surgical anatomy of the head and neck; (2) Diagnosis of various space infections; (3) Therapeutic and surgical treatment including the indications and advantages of each method; (4) Factors determining choice of the antibiotics; (5) Complications that may follow infections of the head and neck.

**34. Oral Disease, Frequent Diagnostic Problems, and Their Practical Solution**

EDWARD C. THOMPSON.....URBANA, ILLINOIS

Presented on Tuesday at 1:30 and 3:30 p.m. in Room 522

Presented on Wednesday at 10:30 a.m. in Room 522

Presentation will be illustrated with slides, in color, and deals with the management of many recurring problems of diagnosis and treatment for which the general practitioner is responsible.

**35. Surgical Procedures the Dentist Should Know**

VIGGO B. SORENSEN.....CHICAGO

Presented on Tuesday at 10:30 a.m. in Room 553

Presented on Wednesday at 1:30 and 3:30 p.m. in Room 553

This clinic will cover a thorough discussion of common oral surgical procedures and will be illustrated with Kodachrome slides. This presentation will include surgical preparation for immediate dentures, removal of hyperplastic tissue, maxillary and mandibular alveolectomies, cysts and biopsies. The technic used in handling each case will serve as a guide for the dentist's oral surgical problems.

## RADIOGRAPHY

**36. Radiographic Technics**

LEWIS B. SPEAR.....INDIANAPOLIS, INDIANA

Presented on Wednesday at 1:45 and 3:45 p.m. in Room 549

Demonstration of a special, longer-than-standard, cone for dental x-ray units, showing simplicity and accuracy of use. Placement of films in the mouth, handling of the film for closer adaptation and to reduce gagging, and the use of a bite block in the lower arch. This is a demonstration of the so called "Bisecting of the Angle Technic."

## PHOTOGRAPHY

**37. Clinical Photography Applied to Dentistry**

HOWARD A. HARTMAN.....CLEVELAND, OHIO

Presented on Monday and Tuesday at 1:45 and 3:45 p.m. in Room 521

This clinic will review the fundamentals of lighting and composition in the production of dental clinical pictures. The portrayal of technics, inanimate objects relative to dental technics and the presentation of these photographs in clinics and essays will also be discussed. Various types of essential photographic equipment will be surveyed and appraised as to their importance in the production of good photo micrographs and clinical pictures. This clinic will be illustrated by means of Kodachrome transparencies.

## FULL DENTURES

### 38. Basic Principles of Full Denture Construction

J. R. CARLTON.....CHICAGO

Presented on Monday at 1:30 and 3:30 p.m. in Room 522

Presented on Tuesday at 10:30 a.m. in Room 561

This procedure will deal with following basic principles: (1) Non-pressure impressions; (2) Registration of positive central; (3) Flexibility of the human condylar mechanism within limits prescribed by balanced articulation; (4) Establishing flat plane of occlusion parallel to a similar condyle path; (5) Orientation of this plane at correct distance from centers of rotation. A colored motion picture will show the entire procedure. This procedure is simple but most accurate. Chair time is conserved throughout and return visits are reduced to an absolute minimum. A table presentation will show the various steps in the procedure and the importance of mounting casts on articulator to centric will be stressed. A problem case will also be demonstrated. Time will be given to discuss all phases of laboratory procedure including anatomical wax-up and color toning of dentures.

### 39. Closed Mouth Impressions for the Edentulous Patient

OAKLEY BRUCE DAVY, JR.....EVANSTON, ILLINOIS

Presented on Tuesday at 10:30 a.m. in Room 505

Presented on Wednesday at 10:30 a.m. in Room 523

Knowledge of the prerequisites of a complete upper or lower impression in addition to technical skill is essential to obtaining an acceptable result. An approach, found clinically satisfactory, using occlusal stress to obtain accurate muscle trims will be described. Lantern slides will supplement the discussion.

### 40. The Surgical-Prosthetic Management of the Extreme Maxillary Protrusion Case

JOHN W. GELLER AND W. DALE LENTZ.....INDIANAPOLIS, INDIANA

Presented on Monday at 10:30 a.m. in Room 503

Presented on Tuesday at 1:30 and 3:30 p.m. in Room 503

Presented on Wednesday at 10:30 a.m. in Room 503

The clinicians will show a movie of a well-chosen case in which all phases of the surgical preparation of the mouth and the steps of construction of immediate dentures are clearly and concisely illustrated. In addition to photography the doctors are well prepared with technic devices and will be available to discuss in detail any questions which may arise. The program is designed to show the necessity of cooperation between the oral surgeon and the prosthodontist, and should be of interest to both fields. Dr. Lentz is an oral surgeon.

### 41. Surgical Corrections, Classifications and Impressions of that Difficult Mandible

ERNEST T. LEWIS.....PITTSBURGH, PENNSYLVANIA

Presented on Monday at 1:30 and 3:30 p.m. in Room 523

Presented on Wednesday at 10:30 a.m. in Room 505-A

In order to demonstrate thoroughly the surgical corrections that simplify that difficult lower; to differentiate between simple and difficult mandibles and to properly select the functional boundary of a completed lower denture, I will use 60 models of the mouth duplicating the above conditions. Maximum stability can only be obtained if the mandible is surgically correct and a true functional periphery is established on the permanent denture.

### 42. Adjusting Artificial Dentures

CHARLES H. MOSES.....TORONTO

Presented on Monday and Tuesday at 10:30 a.m. in Room 522

Through routine corrective procedures on the finished dentures, defects are frequently detected which, on correction, may convert the case from the category of failure into success. The clinician will deal not only with the routine adjustments before delivering the dentures but with complaints which patients may register after wearing them.

**43. The Rehabilitation of the Edentulous Patient**

**WALTER E. MOYER**.....DENVER, COLORADO

Presented on Monday and Tuesday at 10:30 a.m. in Room 523

Presented on Wednesday at 1:30 and 3:30 p.m. in Room 523

Clinician will present the 2000 feet 16 mm colored film, silent 55 minute running time. Covers the relationship between the edentulous patient and the dentist, anatomical survey, impressions (non displacement of tissue), vertical and centric.

**44. Improvements in Immediate Denture Construction**

**MERRILL G. SWENSON**.....PORTLAND, OREGON

Presented on Tuesday at 1:30 and 3:30 p.m. in Room 523

Summary of the main points to be presented: Factors that reduce adjustments and rebasing. (1) Scar tissue avoided and ridge fullness maintained for bearing and retention by proper surgery. (2) An impression tray that assures a complete periphery. (3) Bite preparation that facilitates correct centric jaw relation. (4) Duplication of each tooth position, size and form as well as the arch position for facial contour.

**45. A Combination of Two Technics: Balanced Occlusion Plus Esthetics and Phonetics**

**GILBERT WATKINS STUDY CLUB**

**EVERETT O. HANCOCK**.....SALEM, ILLINOIS

**HARRY D. POTTS**.....CARLYLE, ILLINOIS

**LESTER I. WEBB**.....HARRISBURG, ILLINOIS

Presented on Monday and Wednesday at 1:30 and 3:30 p.m. in Room 505

Combining Fred Meyer's technic of balanced occlusion with Earl Pound's technic of esthetics and phonetics. Methods of determining vertical dimension and occlusal plane. Restoring natural facial contours with a denture base. Where to set the teeth and why.

**45a. Multiple Impression Technic**

**ROSS C. LINDLEY**.....SEATTLE, WASHINGTON

Presented on Tuesday at 1:45 and 3:45 in Room 549

Presented on Wednesday at 10:30 a.m. in Room 549

The clinician will demonstrate a new procedure in the use of hydrocolloid that has created great interest among operative dentists in the Seattle district. The clinic will be augmented by slides and a large number of models.

**PARTIAL DENTURES**

**46. Preparation of a Patient for Partial Dentures**

**ROBERT M. APPLEMAN**.....CHICAGO

Presented on Wednesday at 1:30 and 3:30 p.m. in Room 522

Psychological aspects as well as preparation of the mouth for partial dentures. Maintenance and service.

**47. Need Partial Be a Stepping Stone to Full Dentures?**

**KENNETH P. AUSTIN**.....CHICAGO

Presented on Monday at 1:30 and 3:30 p.m. in Room 533

Proper design can lengthen life of partials. Center of rotation is a factor in partial design. A partial without a proper rest is not a partial. How to properly prepare a rest for tooth stability.

**48. Preserving Natural Teeth Through Use of Clasps**

**MULLER M. DE VAN**.....PHILADELPHIA, PENNSYLVANIA

Presented on Tuesday at 1:30 and 3:30 p.m. in Room 534

The clinic will deal with an analysis of the nature of the clasping problem in partial denture design, having in mind the welfare of the abutment teeth. Clasps will be classified. The advantages and disadvantages of each type of design will be discussed. The roles that a clasp may play will be brought out, such as their use as stabilizers and retainers.

#### 49. Physiological Aspects Involved in Partial Denture Restorations

RAYMOND L. GIRARDOT.....DETROIT, MICHIGAN

Presented on Tuesday and Wednesday at 10:30 a.m. in Room 545

Diagnosis: Evaluation of evidence of oral health status by various methods. Preparation of the mouth. Function and evaluation of traumatic effects. Design: method of engineering the design of the restoration so that the previous objective can be attained. Physiological Environment: Correction of the nutritional patterns of the patient so that a higher health level will insure more satisfactory service with prosthetic restorations.

#### 50. Restoring Teeth Through Precision Bridgework for the General Practitioner

I. FRANKLIN MILLER.....PITTSBURGH, PENNSYLVANIA

Presented on Wednesday at 1:30 and 3:30 p.m. in Room 505A

This clinic presents an approach to extensive restorative dentistry in a simplified form to benefit the general practitioner. Emphasis is placed upon "full coverage" abutments such as the full cast crown, the acrylic faced gold jacket and the porcelain jacket crown as used in mouth rehabilitation cases. Instrumentation and procedures on the preparation of all three types of crowns, correction of objectionable spaces in adults by prosthodontic means, copper plating of dies; waxing technic for the fabrication of the veneer crown and characterizing and staining of porcelain and plastic teeth will be shown. Indications and procedures in the construction of anterior and posterior fixed bridgework, multiple abutments and splinting of teeth will be explored. Steps in the construction of a Precision Case from start to completion, diagnosis, case design, evaluation of precision attachments, treatment planning and practical case reports will be presented.

#### 51. What's New In Bridgework?

HARRY SPIRO.....CHICAGO

Presented on Tuesday at 1:30 and 3:30 p.m. in Room 505A

Newer and better methods of fixed bridge procedure, which combine speed and simplicity with more accuracy than was heretofore possible. Those in attendance will learn how fixed restorations can be done better, and yet, with a saving of time and energy. No more uncertain and troublesome procedures, but—simple steps to precise results. The session will terminate with a one-half hour question and answer period.

### PRACTICE MANAGEMENT

#### 52. The Listening Chair

HOLLIS A. ASKEY.....LINCOLN, NEBRASKA

Presented on Monday at 10:30 a.m. in Room 533

Why it is better to *sit down* for all consultations. How to help people to select good dentistry. How to make and present good study models. How to improve yourself through reading the right books. "Take Home" material to remind patients of your thoroughness.

#### 53. Common Office Problems

WALLACE N. KIRBY.....DOWNERS GROVE, ILLINOIS

Presented on Tuesday at 10:30 a.m. in Room 509A

The speaker will discuss some 20 or 25 common office problems and will offer their solutions. The list of problems developed from questions that were most commonly asked at the conclusion of dental meetings. Attending dentists are urged to bring their own special problems for discussion and analysis.

#### 54. Solving Patient's Grievances

WALLACE N. KIRBY.....DOWNERS GROVE, ILLINOIS

Presented on Wednesday at 10:30 a.m. in Room 509A

The speaker will discuss a variety of typical grievances that have been expressed by patients. These complaints have been compiled from open discussion with many dentists at dental meetings in various parts of the country, from an analysis of problems that have been presented to the Grievance Committee of the Chicago Dental Society, and from the speaker's own professional experience. Both the prevention and the solution of these problems will be discussed.

#### 55. Our Financial Future

MERRITT C. PEDERSEN.....LINCOLN, NEBRASKA

Presented on Tuesday at 10:30 a.m. in Room 521

Presented on Wednesday at 10:30 a.m. in Room 521

A presentation of a definite savings plan to provide a pension program for the dentist. With facts and figures relating to life insurance and investments. It is not how much dentists earn but how much can be saved for later years. Dentists do not *plan to fail*, but fail to plan for their financial future.

#### 56. Fundamental Rules on How to Manage a Busy Dental Practice

JAMES F. PLANTS.....EVANSTON, ILLINOIS

Presented on Monday at 10:30 a.m. in Room 521

Presented on Wednesday at 1:30 and 3:30 p.m. in Room 534

This presentation is designed to help the busy general practitioner. Some of the subjects to be covered are: the office set up; type of employees and their duties; how to determine the cost of operation and proper fees; how to produce more quality dentistry with less effort on the dentist's part and make his work easier and more enjoyable.

#### 57. Establishing Desirable Dentist-Patient Relationships

JOHN L. WOEHLE.....SIERRA MADRE, CALIFORNIA

Presented on Monday at 1:30 and 3:30 p.m. in Room 534

Evaluating the human equation, dentist-auxiliary help, patient. Developing the value of office-team play; esprit-de-corps; third party psychology. Considerations in identity data; patient-dental awareness and patient education. Successful method of examination; diagnosis and case presentation, stressing the essentials of effective contracts, estimates, appointment arrangement and time planning. Summarizing a desired sequence of patient management office procedure.

### MISCELLANEOUS

#### 58. Normal Suggestion and Hypnosis in Dentistry

WILLIAM T. HERON.....MINNEAPOLIS, MINNESOTA

Presented on Monday at 10:30 a.m. and 1:30 and 3:30 p.m. in Room 505A

Presented on Tuesday at 10:30 a.m. in Room 505A

Normal suggestion and suggestibility will be discussed and demonstrated using members of the group as subjects. Hypnosis as a condition of greater suggestibility will also be demonstrated and it will be shown that this state can be advantageously used in dentistry. It is particularly useful in relaxing the patient and alleviating the anxiety sometimes connected with dentistry.

## ESSAY PROGRAM

HENRY Q. CONLEY, *Chairman*

W. G. F. SCHMIDT, *Vice-Chairman*

### Monday Morning

9:30—Plastics in Operative Dentistry

HERBERT D. COY, RICHMOND, VIRGINIA.....SOUTH BALLROOM

Presiding Chairman James K. Betty

9:30—Occlusal Dynamics and Equilibration in Modern Orthodontics

JOHN I. INGLE, SEATTLE, WASHINGTON.....PRIVATE DINING ROOM NO. 2

Presiding Chairman Frederick T. Barich

9:30—Full Dentures for the General Practitioner

RALPH E. LIBBERTON, CHICAGO.....NORTH BALLROOM

Presiding Chairman Felix S. Tittle

9:30—Occlusion in Periodontia

G. R. LUNDQUIST, CHICAGO.....WEST BALLROOM

Presiding Chairman John W. Seaborg

11:00—Preserving Natural Teeth Through Use of Clasps

MULLER M. DE VAN, PHILADELPHIA, PENNSYLVANIA.....NORTH BALLROOM

Presiding Chairman LaMar W. Harris

11:00—Biopsy, Diagnosis and Treatment of Oral Tumors

JAMES R. HAYWARD, ANN ARBOR, MICHIGAN.....WEST BALLROOM

Presiding Chairman Lyle F. Aseltine

11:00—What the General Practitioner Should Know About the  
Extraction of Teeth in Orthodontics

BEN L. HERZBERG, CHICAGO.....PRIVATE DINING ROOM NO. 2

Presiding Chairman Frederick T. Barich

11:00—Building and Preserving a Dental Practice

HARRY M. KLEND, WICHITA, KANSAS.....SOUTH BALLROOM

Presiding Chairman Arthur W. Leaf

### Monday Afternoon

1:30—Physiological Aspects Involved in Partial Denture Restorations

RAYMOND L. GIRARDOT, DETROIT, MICHIGAN.....SOUTH BALLROOM

Presiding Chairman Felix S. Tittle

1:30—Orthodontic Treatment in the Early Years in the Light of Newer Knowledge

SAMUEL J. LEWIS, KALAMAZOO, MICHIGAN.....PRIVATE DINING ROOM NO. 2

Presiding Chairman Frederick T. Barich

1:30—An Evaluation of Technics for Condensing Amalgam Restorations

JOHN H. MOSTELLER, MOBILE, ALABAMA.....LOWER TOWER

Presiding Chairman James K. Betty

- 1:30—Conservative Periodontal Therapy  
SIGURD RAMFJORD, ANN ARBOR, MICHIGAN.....WEST BALLROOM  
Presiding Chairman John W. Seaborg
- 2:00—The Dentist and the Public  
HAROLD HILLENBRAND, CHICAGO.....NORTH BALLROOM  
Presiding Chairman Robert J. Pollock
- 3:00—The Use of Chrome Steel in Dentistry for Children  
WILLIAM P. HUMPHREY, DENVER, COLORADO.....LOWER TOWER  
Presiding Chairman Maurice C. Berman
- 3:00—Principles in Crown and Bridge  
EDWIN S. SMYD, DETROIT, MICHIGAN.....SOUTH BALLROOM  
Presiding Chairman R. Wayne Covalt
- 3:00—Radiographic Technics  
LEWIS B. SPEAR, INDIANAPOLIS, INDIANA.....WEST BALLROOM  
Presiding Chairman Sigmund F. Bradel
- 3:15—What to Do About Cleft Palate Cases  
SYMPOSIUM .....NORTH BALLROOM  
Presiding Chairman W. G. F. Schmidt
- Moderator, T. M. Graber  
Problems in Diagnosis  
Samuel Pruzansky, Chicago  
Oral Surgery  
Wayne B. Slaughter, Chicago  
Prosthesis  
Henry Glupker, Chicago  
Speech Correction  
Harold Westlake, Evanston

#### Tuesday Morning

- 9:30—Need Partial Be a Stepping Stone to Full Dentures?  
KENNETH P. AUSTIN, CHICAGO.....SOUTH BALLROOM  
Presiding Chairman W. G. F. Schmidt
- 9:30—Prevention of Complications in Oral Surgery  
MARVIN E. CHAPIN, CHAPEL HILL, NORTH CAROLINA.....NORTH BALLROOM  
Presiding Chairman Lyle F. Aseltine
- 9:30—Restorations of Silver Amalgam  
DONALD A. KEYS, LINCOLN, NEBRASKA.....WEST BALLROOM  
Presiding Chairman James K. Betty
- 9:30—Youths and You  
FRANCIS J. LOUGHLIN, JAMAICA, NEW YORK.....PRIVATE DINING ROOM NO. 2  
Presiding Chairman Frederick T. Barich
- 9:30—Establishing Desirable Dentist-Patient Relationships  
JOHN L. WOEHLE, SIERRA MADRE, CALIFORNIA.....LOWER TOWER  
Presiding Chairman Arthur W. Leaf

- 11:00—The Scope and Objectives of Modern Endodontics  
VICTOR H. DIETZ, ST. LOUIS, MISSOURI.....LOWER TOWER  
Presiding Chairman Sigmund F. Bradel
- 11:00—Surgical Corrections, Classifications and Impressions of That Difficult Mandible  
ERNEST T. LEWIS, PITTSBURGH, PENNSYLVANIA.....WEST BALLROOM  
Presiding Chairman Felix S. Tittle
- 11:00—Restoring Teeth Through Precision Bridgework for the General Practitioner  
I. FRANKLIN MILLER, PITTSBURGH, PENNSYLVANIA.....NORTH BALLROOM  
Presiding Chairman LaMar W. Harris
- 11:00—The Use and Relative Merits of Reversible Hydrocolloid and Alginate  
for Indirect Restorations  
RALPH W. PHILLIPS, INDIANAPOLIS, INDIANA.....SOUTH BALLROOM  
Presiding Chairman R. Wayne Covalt

#### Tuesday Afternoon

- 1:30—Applied Nutrition in General and Periodontic Practice  
HARRY ROTH, NEW YORK.....SOUTH BALLROOM  
Presiding Chairman John W. Seaborg
- 1:30—Surgical Correction of Mandibular Prognathism by Open Condylotomy.  
A New Technic  
ARTHUR E. SMITH, LOS ANGELES, CALIFORNIA.....WEST BALLROOM  
Presiding Chairman Lyle F. Aseltine
- 1:30—Nutrition  
H. TRAUTMAN, MADISON, WISCONSIN.....NORTH BALLROOM  
Presiding Chairman R. Wayne Covalt
- 2:00—Preventive Orthodontics and Minor Corrections  
WILLIAM S. BRANDHORST, ST. LOUIS, MISSOURI.....PRIVATE DINING ROOM NO. 2  
Presiding Chairman Maurice C. Berman
- 3:00—Balanced Occlusion  
LEROY E. KURTH, CHICAGO.....NORTH BALLROOM  
Presiding Chairman LaMar W. Harris
- 3:00—Full Cast Crowns with Plastic Veneers  
RAY G. PERSCHBACHER, DENVER, COLORADO.....SOUTH BALLROOM  
Presiding Chairman W. G. F. Schmidt

#### Wednesday Morning

- 9:00—Restorative Procedures to Improve Esthetics in Oral Rehabilitation  
S. CHARLES BRECKER, NEW YORK.....SOUTH BALLROOM  
Presiding Chairman R. Wayne Covalt
- 9:00—Current Findings on Fluoridation Studies  
SYMPOSIUM .....NORTH BALLROOM  
Presiding Chairman W. G. F. Schmidt

Moderator: Robert G. Kesel  
 Francis A. Arnold, Jr., Bethesda, Maryland  
 J. Roy Blayney, Chicago  
 W. Philip Phair, Chicago  
 Isaac Schour, Chicago

- 9:30—The Dentist Takes a Look at Himself  
 HOLLIS A. ASKEY, LINCOLN, NEBRASKA.....LOWER TOWER  
 Presiding Chairman Arthur W. Leaf
- 9:30—The Application of Radioactive Isotopes in Dentistry  
 WILLIAM WARD WAINWRIGHT, CHICAGO.....WEST BALLROOM  
 Presiding Chairman Sigmund F. Bradel
- 11:00—Management of the Child Patient and Parent  
 FRANCIS W. SUMMERS, LOS ANGELES, CALIFORNIA.....LOWER TOWER  
 Presiding Chairman Maurice C. Berman
- 11:00—Clinical Importance of Small Strokes  
 WALTER C. ALVAREZ, CHICAGO.....NORTH BALLROOM  
 Presiding Chairman James K. Betty
- 11:00—Problems Involved in Pulp Therapy for Children  
 GEORGE W. TEUSCHER, CHICAGO.....WEST BALLROOM  
 Presiding Chairman John W. Seaborg
- 11:00—Reading of Prize Essay (See page 22).....PRIVATE DINING ROOM NO. 2

### Wednesday Afternoon

- 2:00—The Chair-side Manner in Child Dentistry  
 ELIZABETH LEVITIN, GLENCOE, ILLINOIS.....WEST BALLROOM  
 Presiding Chairman Maurice C. Berman
- 2:00—Adjusting Artificial Dentures  
 CHARLES H. MOSES, TORONTO.....NORTH BALLROOM  
 Presiding Chairman LaMar W. Harris
- 3:00—Improvements in Immediate Denture Construction  
 MERRILL G. SWENSON, PORTLAND, OREGON.....NORTH BALLROOM  
 Presiding Chairman Felix S. Tittle
- 3:00—Surgical Aids to Intra-Oral Prosthesis  
 J. ORTON GOODSSELL, SAGINAW, MICHIGAN.....SOUTH BALLROOM  
 Presiding Chairman Lyle F. Aseltine

## TABLE CLINICS

There  
are no  
prosthetically  
hopeless  
cases!

Throughout the past 30 years we have had intimate daily contact with some of the most perplexing problems ever to challenge the science of prosthetic dentistry. This experience has rendered us unusually well equipped to show you we have helped countless other dentists to achieve perfect restorations—even in cases of severe diastema due to widely spaced teeth, missing teeth or abnormal placement of anterior teeth.

If you'd like to compare notes, bring your study models to our booth at the Conrad Hilton Hotel when you're in Chicago for the big Mid-Winter meeting of the Chicago Dental Society. We'll be looking forward to seeing you.

*In the meantime, however, use our other specialties . . .*

## NEWS AND ANNOUNCEMENTS

(Continued from page 14)

members, both committees hope that dentists from other states will make a point of stopping in at Dining Room No. 3 and discussing with these committees how the illegal laboratory and the unethical dentist problems are handled in their states.

### ENGLEWOOD BRANCH JANUARY MEETING

The Englewood Branch of the Chicago Dental Society will hold its January meeting on the 13th at Nielsen's Restaurant. Dr. Carl Gieler will present a program consisting of two parts; the first will be a diversified impression technic that will meet many different mouth conditions; the second half will be devoted to a question and answer period to cover many of the common dental problems. Dr. Gieler was associated with Northwestern

University both in the surgery and prosthetics departments for twelve years. He is a Diplomate of the American Society of Prosthodontists.

### C.D.A.A. 30TH ANNIVERSARY

The officers of the Chicago Dental Assistants Association will blow out 30 candles on the birthday cake, when the Association celebrates its 30th Anniversary, Thursday, January 15, at 8:00 p.m., at the Sherman Hotel.

We are fortunate in having Mr. C. H. Fletcher, well-known handwriting identification expert and lie detector examiner, as our speaker for the evening. Mr. Fletcher's subject is "How to Use the Lie Detector in 'The Dental Profession.'" As this program will be of interest to others, we also invite dentists, hygienists and technicians to attend. After the program, refreshments will be served. To help defer expenses, a small charge will be made.—*Harriet Turner, Publicity Chm.*

**WHY NOT YOU** - Hundreds of your colleagues are now extending time payment courtesy to their patients BUT receive IMMEDIATE CASH from US.

**VERY LOW RATES** — The lowest budget fee ever offered. A dignified service by a small organization serving the community for 20 years and qualified to serve your patients in a manner befitting your profession.

### **EWING CONSULTANT TO A.D.A. COMMITTEE**

Dr. W. T. Ewing of Akron, Ohio, who is to be the January essayist before the Chicago Dental Society's regular monthly meeting, has been invited by Dr. Otto W. Brandhorst of St. Louis, President of the American Dental Association, to serve as a consultant to the Special Committee on Problems in the Field of Oral Surgery which held its first meeting November 29-30 in the Association's Central Office. The Committee considers problems related to the definition of the field, including hospital dental service and inter-professional relations.

### **AMERICAN ACADEMY OF IMPLANT DENTURES ANNOUNCES DEDICATORY MEETING**

The American Academy of Implant Dentures has announced that Saturday, February 7, 1953 is the date set for the

Dedicatory Meeting of the Society. This meeting is to be held at the Sheraton Hotel, 505 N. Michigan Ave., at 10:00 a.m. and precedes the Midwinter Meeting of the Chicago Dental Society.

Extreme interest has already been shown in this meeting; therefore, the Convention Committee requests that the ten dollars reservation fee be mailed to reach the office of the Convention Chairman, Dr. William E. Barb, 668 E. Maple Road, Indianapolis, Indiana, no later than midnight, January 15, 1953.

### **LOYOLA CLASS OF '28 DINNER DANCE**

The Class of '28 of the Loyola University School of Dentistry will hold their dinner-dance on Tuesday, February 10, 1953, at the Blackstone Hotel—cocktails at 6:30 p.m., dress informal. Mail reservations to Dr. Max S. Ungar, Secretary, 2750 W. North Avenue, Chicago 47, Illinois.—Orville C. Larsen, Chairman.

We are looking forward to seeing you at the

## **YOUR L & L COMMITTEE AT WORK**

*(Continued from page 15)*

Laboratory issue of the FORTNIGHTLY REVIEW. You have all received a complete listing of the defendant laboratories in the present legal suit. The chairman of each branch L and L Committee has been invited to attend and participate in a meeting of the general L and L Committee. Each local chairman has been asked to carry back to the members as much information as was available at that time. The Directors have been asked to report at each local branch meeting on this problem. A meeting room at the Midwinter Meeting is being set up in order to discuss with any individual member any information he may have to give or desire to receive on this problem. This room will be staffed continuously by members of the Legislative and Law Enforcement Committee as well as members of the Ethics Committee. This page in the FORTNIGHTLY REVIEW has been arranged in order to provide the widest dissemination of current information to each and every member alike.

These reports from each subcommittee indicate the scope of work being done and the vital need for active help from each of us. Paying our current dues certainly gives us the right to "gripe." But it also obligates us, individually and collectively, to support and work for the betterment of our organization. If we are willing to do this, then and only then do we have the right to complain about lack of progress. Many of the members have already come forward with excellent suggestions as well as concrete information which have immeasurably aided our cause. Read these subcommittee reports carefully. Give help wherever possible as this "cancerous problem" must be eliminated. Each of us willingly contributing our share of effort will certainly result in reaching a successful conclusion to this present menace to the dental profession.

## **LEGAL ACTION SUBCOMMITTEE**

**FRANK FARRELL, CHAIRMAN**

Hearings on the laboratory suit are being held before the Master-in-Chancery and testimony is being presented by our attorneys. Numerous dental society members have attended these hearings and all agree that it is a most difficult matter to secure evidence from persons willing to testify. The entire illegal laboratory situation is one based upon stealth, secrecy, dark rooms, shaded windows, and alley stairways. Many persons who have gone to laboratories willingly will not admit their part in the shady transaction. Our best witnesses are those who have suffered in the unskilled hands of some technician, or who have been sued for balances due on unusable dentures.

The successful conclusion of our suit is not in the immediate future. There is a tremendous amount of work yet to be done. We are nicely started but efforts put forth to date must be multiplied many times.

We need names of laboratory patients, names of laboratories operating illegally, and any other information that dental society members can provide.

## **PUBLICITY AND PUBLIC RELATIONS SUBCOMMITTEE**

**JOSEPH T. BROPHY, CHAIRMAN**

The duties of the Subcommittee on Publicity and Public Relations include the utilization of any and all means available which will tend to bring to the public a realization of the necessity of seeking the services of a qualified dentist and, conversely, of avoiding the quack and the charlatan. It has come to our attention that many neighborhood, church, club, and foreign language publications carry advertising of laboratories which are habitual violators of the Dental Practice Act. By the acceptance of such advertising, these organizations lend their moral support and prestige to such violators, undoubtedly against the conviction

## HALLANCO GOWNS are Individually Tailored

Style #40

We use quality Poplins, Broadcloths, and Nylons with the best possible tailoring. The gowns are made to individual measurements, and the measurements are retained.

If you are looking for better office gowns, be sure and call at our exhibit booth #188 and we will show you why they are better.

We are exclusive professional garment manufacturers, and have been in the gown business for 20 years—We know that the dentists of today want good-fitting quality gowns.

Check your gown needs and see us at your Mid-winter Chicago Meeting. We will be glad to see you.

(Accepted by Council of Physical Medicine, A.M.A.)

and the better judgment of their subscribers and leaders.

It is the purpose of this committee to bring the facts of this situation forcibly to the attention of the editors and publishers of these papers. To accomplish this, we must compile a listing of all such publications. Therefore, we urgently request all C.D.S. members to do the following three things: 1. Be on the lookout for all such advertising. 2. Obtain a copy of the medium in which it appears and forward same to the Society office with the name and address of the sender. 3. Protest such advertising to the editor, *in person*.

The laboratory situation is a problem of many ramifications but this is one area of action where we feel that we can be effective—with the cooperation of the membership, of course. Don't wait for your neighbor to do the job; do it yourself—*now*.

**POLICY, PROFESSIONAL AND TRADE  
RELATIONS SUBCOMMITTEE  
WILLIAM F. TOLAR, CHAIRMAN**

This subcommittee's function is primarily to make contact with organized dental groups—the American Dental Association, the Illinois State Dental Society, and with the various dental laboratory associations, for the exchange of information as it pertains to the laboratory problem that confronts Chicago dentists and which, if not corrected, will eventually affect the dental profession on state and national levels.

During the past two months, contacts have been made with organized groups and several meetings are scheduled for the next month.

The American Dental Association's offices were contacted and our problem was presented, and they assured us that when the time came and we needed assistance they will come to our aid.

The same problems were presented to the Illinois State Dental Society office and we were assured that they will be presented to the meeting of the Executive

Council of the State Society at Peoria, Illinois, January 9, 1953. Drs. Vincent B. Milas and Walter E. Dundon were appointed to act as liaison between the L & L Committee and the State Dental Society.

A meeting was held with an official of one of the organized laboratory associations during the Midwest Congress for dental technicians, November 2, 1952, in Chicago, and he assured us that the members of his association are ready to cooperate with organized dentistry to clean up the laboratory situation.

**POLITICAL ACTION SUBCOMMITTEE  
JAMES N. LYNCH, CHAIRMAN**

The membership of the Dental Society and especially those entrusted with special assignments have put forth considerable effort to promote the interests of the profession.

Our representatives have been in contact politically and personally with all levels of political strata in the state. Those contacted are definitely sympathetic to our problems, and with continued effort we will get the desired result.

The Department of Registration and Education has been cooperative but any concrete program of action must now await the new appointments to both the Department and the Board of Dental Examiners.

Personal appointments have been sought with newly elected officials and in view of their pre-election statements, we are anxious to consult with them in their official capacities.

**APPLICANTS**

(Continued from page 50)

FLESSOR, ARISTOTLE T. (Loyola 1952) Kenwood-Hyde Park, 3005 E. 52nd St. Endorsed by Rinert Gerhard and R. W. Mitchener.

McFARLAND, ROBERT V. (Loyola 1952) Northwest Side, 4911 W. Irving Park Rd. Endorsed by A. H. Altern and Robert H. Lundgren.

# SEPTISOL

WITH HEXACHLOROPHENE 0.75%

## ANTISEPTIC LIQUID SOAP

*for Mildness, Surgical Cleanliness, Economy*

—Extensive tests in independent laboratories and in over 2500 hospitals have proven SEPTISOL:

- Does not irritate the normal skin. Low ph and emollient in SEPTISOL prevent keratolytic action; leaves hands soft and clean.

- Sharply reduces bacterial count — hands are surgically clean after washing with SEPTISOL.

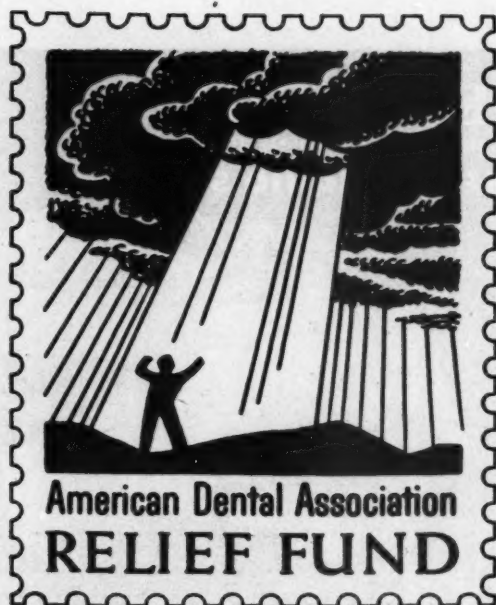

- Economical—Being a concentrate, one gallon makes two gallons use solution.

THIS HANDY SOAP DISPENSER FREE  
with each gallon of concentrated SEPTISOL with  
Hexachlorophene .75% Antiseptic Liquid Soap

*for:*  
**ESTHETIC, DURABLE, POSTERIOR FILLINGS.**

**P.F.**

POSTERIOR FILLING

IN ELEVEN WAYS

**SUPERIOR TO AMALGAM!**

 **UNCONDITIONALLY RECOMMENDED  
 FOR ALL POSTERIOR FILLINGS**

1. **ESTHETICS:** P-F matches posterior teeth perfectly.
2. **RETENTION:** P-F bonds to the tooth walls. Deep, painful undercuts are unnecessary.
3. **PULP PROTECTION:** P-F will not transmit thermal shock like amalgam.
4. **MARGINS:** P-F is rigid. Does not flow like amalgam or acrylic. Margins remain sharp.
5. **NON-POLAR:** Like a natural tooth, there is no electrolytic action. Amalgam often causes electric shocks and tastes.
6. **DISCOLORATION:** P-F causes no discoloration. Amalgam stains, causes shadow, and is completely non-esthetic.
7. **HARDNESS:** P-F becomes permanently hard in five minutes. Patient can chew immediately after discharge. Amalgam must be babied for 24 hours.
8. **IMPACT:** P-F withstands greater impact than amalgam. P-F may be used in complete restorations for P-F actually supports the tooth.
9. **SET:** P-F sets wet or dry. Amalgam must be kept dry for best results.
10. **INSOLUBLE:** P-F will never wash out. Amalgam can become soft and porous in certain mouths.
11. **ABRASION:** By actual laboratory tests, P-F has far greater abrasion resistance than amalgam.
